STORM DRAIN CONSTRUCTION TO CLOSE INTERSECTION IN LOS SERRANOS AT VALLE VISTA DRIVE AND LOS SERRANOS BOULEVARD

Construction of storm drains in the Los Serranos area will result in a complete intersection closure at Valle Vista Drive and Los Serranos Boulevard from Monday, March 8th through Friday, March 12th and from Monday, March 15th through Wednesday March 17th. Changeable message signs will be posted in the area to advise motorists of the closure. Detours are available for local residents. Motorists are advised to avoid the area when possible.

The work is Phase 1B of the City of Chino Hills' Los Serranos Capital Improvement Project. Sandoval Pipeline Engineering of Rancho Cucamonga is doing the work as part of the \$671,465 contract the City awarded to construct storm drains on Valle Vista Drive between Del Norte Avenue and Country Club Drive, and Descanso Avenue between Sierra Vista Drive, and Valle Vista Drive. These streets will be closed to through traffic periodically through early April. Local access will be maintained at all times as workers install 22 catch basins and piping along the above mentioned areas. Motorist who use these streets are encouraged to use other routes during the construction period. Questions regarding the construction should be directed to Fe Rama, Associate Engineer, at (909) 364-2776
