CITY SOLICITS INPUT ON PIPELINE AVENUE MEDIAN PROJECT COMMUNITY OUTREACH MEETING JANUARY 14TH

Chino Hills, CA - The City of Chino Hills has received grant funding to construct a raised median on Pipeline Avenue north of Chino Hills Parkway. A Community Outreach Meeting will be held to gather comments and input from 7:00 – 9:00 p.m. on Thursday, January 14th at the McCoy Equestrian & Recreation Center, 14280 Peyton Drive. Approximately 300 notices were mailed to businesses along the Pipeline Avenue corridor to notify them of the opportunity to provide input. A brief presentation is planned at 7:00 p.m. Staff will be on hand until 9:00 p.m. to answer questions and collect input and comments. Persons who are unable to attend the meeting may provide input via email to mraab@chinohills.org, or by calling the City's Senior Civil Engineer, Mark Raab, at (909) 364-2746.

Currently there are many conflicting turning movements on this busy corridor, and the installation of a raised median has been planned to reduce these movements and improve vehicular safety. The City's Engineering Department has developed a plan that strives to achieve a balance that considers both safety and access to the businesses along this segment of Pipeline Avenue. Engineers reviewed various existing constraints and considered driveways that align on the west and east side(s) of Pipeline Avenue, distance from the traffic signal at Chino Hills Parkway to proposed openings in the median, and a variety of rules and regulations contained in California's adopted Manual of Uniform Traffic Control Devices (MUTCD). A copy of the conceptual design for the Pipeline Avenue median can be viewed at www.chinohills.org/PipelineMedian.
