LARGE DOGS TO BE REDIRECTED AT VILA BORBA PARK DURING TURF RENOVATION – RE-OPENING DELAYED

Chino Hills, CA – The large dog side of the dog park at Vila Borba Park has been closed for turf renovation. The closure has been extended through May 4th to allow the turf more time to establish. The schedule anticipates a May 5th re-opening of the large dog side of the park. During the closure, the small dog side will be separated into two sides with portable fencing so that the large dogs may still enjoy visiting the dog park. There are two access gates for the small dog area and temporary signage will direct dogs to the proper side during the renovation.

The dog park at Vila Borba Park, 17001 Amadora Drive, has been very popular since its grand opening in December 2015. Large dogs love to run in packs during their visits to the park and their large paws have caused significant wear on the turf. According to City officials, residents requested real grass as the dog park during the design input process. Real grass does require periodic renovation. Part of the renovation will include laser leveling to improve drainage and reduce the pooling of water during and after rain.
