PUBLIC WORKS OPEN HOUSE – MAY 9th

Chino Hills, CA – In honor of National Public Works Week, the City of Chino Hills Public Works Department invites residents to stop by City Hall, located at 14000 City Center Drive, on Tuesday, May 9th from 2:00 – 7:00 p.m. to learn more about their operations. The Public Works Department has operational and maintenance responsibility for water and sewer service, streets, parks, medians, slopes, open space, trees, graffiti removal, facilities, street sweeping, and storm drains. In addition, the Department is responsible for planning public infrastructure in the City, managing the Capital Improvement Program, and designing and constructing various improvement projects in the City. Public Works professionals will be on hand to answer residents' questions regarding the services they perform on a daily basis, and the projects they design and build.

Kids will enjoy sitting in the driver's seat of a tractor or the hydro-excavator. A photo op area will be available where kids can put on a hard hat and safety vest and pose for a picture. A 30' personnel lift, an aerial boom truck, and the camera truck that inspects sewer pipes will also be on display. Several large pieces of equipment will be on display to highlight a few of the many tools that are needed to keep the water flowing, the toilets flushing, the traffic moving, and the parks ready for enjoyment. Displays will include different types of water service lines, surveying equipment, metering equipment, a variety of pumps, and pipeline materials. The City's tools and devices are operated by highly-skilled, professionals, who consider safety their highest priority. A large water model will be on display to demonstrate how rainwater is stored in the underground aquifer. Kids can also learn about the importance of water conservation, environmental protection, and water pollution prevention by watching a watershed demonstration that shows how pollutants wash into the storm drains and out to the ocean.

Free refreshments and giveaways will be available. Please call (909) 364-2800 for additional information.
