LARGE DOGS TO BE REDIRECTED AT VILA BORBA PARK DURING TURF RENOVATION – JULY 9th – AUGUST 3rd

Chino Hills, CA – The large dog side of the dog park at Vila Borba Park will be closed for renovation of the existing turf starting on Monday, July 9th. During the closure, the small dog side will be separated into two sides with portable fencing so that the large dogs may still enjoy visiting the dog park. There are two access gates for the small dog area and temporary signage will direct dogs to the proper side during the renovation. The schedule anticipates an August 4th re-opening of the large dog side of the park unless weather causes delays.

The dog park at Vila Borba Park, 17001 Amadora Drive, has been very popular since its grand opening in December 2015. According to City officials, large dogs love to run in packs during their visits to the park and their large paws cause significant wear on the turf. Residents requested real grass as the dog park during the design input process. Real grass does require periodic renovation.
