## **SLURRY WORK BEGINS IN VILLAGE OAKS AREA AFTER REPLACEMENT OF WATER LINE SERVICE SADDLES**

Chino Hills, CA – Crews have been at work for months in the Village Oaks area of Chino Hills on the first phase of a massive \$2.7 million project to replace over 1,000 “service saddles” which connect the household water lines with the main water line. According to Public Works Director Nadeem Majaj, over 30 years ago, the saddles used were made of cast iron, which reacted to the corrosive soil in Chino Hills. In recent years, water service in the area has been disrupted by many failures of these service saddles. Over 300 brass saddles have been installed during the \$770,000 Phase 1 project. Palp, Inc. (DBA Excel Paving Company) is completing work to repair trenches, and patch and crack seal the street. Application of slurry seal is scheduled for Monday, July 16<sup>th</sup> and Tuesday, July 17<sup>th</sup>. Residents will be notified by door hangers and will be required to move their vehicles to other streets and avoid the area as the slurry cures. For additional information, please call (909) 364-2770.
