## POOL/SPA DEMOLITION REQUIREMENTS

1. Disconnect all pool equipment and remove from property. (This includes all electrical wiring and breakers that feed pool lighting and equipment.)
2. Break holes in bottom of pool shell (minimum 12" x 12" in size at every 10 sq. ft. of pool bottom to expose earth below).
3. Break off coping between pool shell and pool deck.
4. Call for inspection.
  - A. Backfill pool by: Two (2) sack slurry up to within one (1) foot of top pool shell, then place one (1) foot of soil after slurry has set.
  - B. Backfill with non-expansive soil placed and compact under the supervision of a soils engineer. A field memo will be required for final inspection.
5. Call for final inspection

\*For City permit purpose a valuation of \$5,000 shall be used.
