PROCESS

If application is approved, an inspector will call to schedule an appointment to discuss the rehabilitation work. The inspector will create a work write-up with approved work that be used to obtain competitive bids from licensed contractors. The City will review the bids and assist in selecting the most cost-reasonable bid. After the work is completed, the work will be inspected for final approval. The contractor will provide an invoice and current W9 tax form along with any necessary City or California Department of Housing and Community Development (HCD)

permits. Upon approval, the contractor is then paid. Payment to contractors can take up to 60 days.

1. Initial Inspection

All work done under this program will be subject to inspection. An initial inspection shall be conducted by City Staff or a qualified consultant to determine the current conditions of the property. The purpose of this inspection is to ascertain the amount of rehabilitation needed and/or determine the eligibility of the improvements requested. The inspection will be conducted in such a manner that each deficiency/violation will be recorded with respect to the property rehabilitation standards for the program that has been applied for.

Lead-based paint evaluation and requirements for pre-1978 units

If the housing unit in question was built prior to January 1, 1978, the lead-based paint requirements apply. Any required lead-based paint inspections (initial and clearance) will be performed by an approved City vendor. The cost of initial testing and clearance will be included as part of the owner's grant. In the event that an initial clearance test fails, it will be the contractor's responsibility to pay for supplemental clearance tests. The contractor engaged to encapsulate and/or stabilize lead-based paint will not be paid until evidence of a lead-based paint clearance is presented to the City. Lead based paint inspection reports and risk assessments (as applicable) will be provided to the owner and made available to contractors.

Emergency Repairs

An immediate rehabilitation is considered necessary to address emergency situations such as natural disasters and life safety emergencies such as nonfunctioning hot water heaters, furnaces, leaky roof, etc. The determination of an emergency will be made on a case-by-case basis by the Community Services Director. The amount of the grant funding that the applicant will receive will cover the cost to eliminate the emergency condition only. If any grant funds remain and other repair projects are needed, they will follow the general process.

2. Work Write-up

A work write-up shall be prepared by City Staff or a qualified consultant to include rehabilitation work items necessary to address all concerns.

3. Cost Estimate

Based on the work write up, the City's rehabilitation consultant shall prepare a written cost estimate to assist in determining the reasonableness of bids received from contractors. The cost estimate shall be reviewed and approved by City Staff prior to bidding.

4. Bidding, Contractor Eligibility, and Contract Award

- a. Applicants may NOT perform repairs themselves. All work must be performed by a licensed contractor. The work write-up shall be used by City Staff or a qualified consultant to solicit not less than three (3) bids from eligible contractors. Of the bids submitted, the City shall award the contract to the qualified contractor whose bid is most cost-reasonable, provided that the costs are reasonable in comparison to the cost estimate generated prior to bidding. The cost for all necessary building permits must be included in the total project cost.
- b. Applicants may select their own contractors as long as they satisfy the requirements set forth below:

- Copy of their current license from the State of California Contractors State License Board indicating the classification (“B” for general and “C” for specialized work). City staff shall confirm the validity of the contractor’s license by accessing the California State Licensing Board website. - c. City staff shall verify that the contractor’s company name and all listed personnel are not included in HUD’s most recent list of contractors debarred from participating in federally funded projects by accessing the System of Award Management website.

5. Notice to Proceed

A Notice to Proceed will be issued by the City of Chino Hills prior to the commencement of work. All projects must be completed within 90 days from the date of the Notice to Proceed, or as otherwise specified or permitted by the City of Chino Hills. The contract will solely be between the property owner and the contractor.

6. Change Orders

A cost analysis shall be performed of any change order that would add additional scope and cost to the project. This analysis shall be performed to establish costs reasonableness. The contractor shall furnish information on the cost of materials, overhead and profit so that the City may determine the reasonableness of the proposed change order.

7. Final Inspection

A final inspection will be required for all work performed and completed under this contract and before any payments are issued to the contractor. Subsequent to the receipt of the contractor’s final invoice, City Staff or qualified consultants shall visit the property to review the completed rehabilitation work with the Applicant to ensure that all contracted work has been completed. Final photographs of the completed works shall be obtained and filed with the photographs from the initial inspection to show the conditions of the property before/after. If the project requires a building permit, a City Building Inspector will perform required inspections as mandated by the Uniform Building Code and/or the City’s Municipal Code. Some work will require a building permit that must be obtained from the California Department of Housing and Community Development (HCD).

8. Payment

All work will be paid to the selected contractor by the City of Chino Hills within 60 days of completion of the project.
