

Tehachapi Renewable Transmission Project (TRTP)

Chino Hills: Construction Update

October 7, 2011

During **October 10 – 14, 2011**, construction in the city of Chino Hills as part of Southern California Edison's (SCE's) Tehachapi Renewable Transmission Project (TRTP) will include the activities listed below.

Please note – construction hours: Crews will continue making every effort to limit construction to the hours of **7:00 a.m. – 5:00 p.m., Monday – Friday**. However, it may be necessary at times of unforeseen conditions for crews to continue project activities within the utility right-of-way beyond that time.

Every effort will be made to reduce the amount of noise generated by the following construction activities:

- **Continue assembly of steel materials and installation of new electrical transmission structures:**
 - **Three lattice steel structures**

If you have any questions about the scheduled work or other project-related activities, please call the TRTP 24-hour hotline at **(877) 795-8787** or visit **www.sce.com/tehachapi**

Tips for Minimizing Construction Impacts

SCE is committed to minimizing any inconvenience and ensuring public safety during this work. In addition to SCE efforts to minimize the impacts to residents and businesses during construction, here are some simple tips that may help you reduce construction disturbance:

- Close all windows and doors facing the construction area in order to reduce noise and dust.
- Watch for information updates in the form of mailers, door hangers, etc. to ensure you have the most up-to-date information about construction activities taking place in your area.

Please note that this schedule is preliminary and may change depending on weather and other factors.
